## PROFILE

### Full Stack Web Developer

## EXPERIENCE

#### WEB DEVELOPER: Heifer International, Jan. 2018 - Present

- Worked as a full stack developer in the code infrastructure, primarily the presentation and API layers, using technologies across several frameworks, including JavaScript and PHP.
- Developed new features as requested by the Marketing Department, extended existing code base functionality, integrated with third-party APIs, and fixed bugs.
- Worked extensively with e-commerce cart experience and code on Heifer's website.
- Integrated the site with alternative payment methods such as Apple Pay, Google Pay and Venmo on the one-page donation form and regular cart checkout flow.
- Managed new feature and bug fix code releases. Created a marketing microsite and worked on other various Heifer code repositories.
- Created script to charge monthly donors directly via the Braintree API. Worked on Gift Card importer feature. Worked on a cron job that generates csv files for Heifer's CRM.
- Regularly collaborated with other teams, vendors and developers.

#### WEB DEVELOPMENT INTERN: Information Network Arkansas, June 2017 - Dec. 2017

- Wrote responsive, clean front-end code based on Sketch designs for INA clients and integrated with ExpressionEngine.
- Projects included INA website redesign, Arkansas Governor's website redesign, Arkansas Secretary of State website redesign, and a new shopping website for Arkansas Correctional Industries.

#### WEB DEVELOPMENT STUDENT: University of Arkansas at Little Rock, Jan. 2016 - May 2017

- Student in UALR's web development program, which included learning object-oriented programming fundamentals and developing web applications, using the latest technologies.

#### SOCIAL MEDIA MARKETING DIRECTOR: Arkansas Times, OCT. 2014 – Sept. 2016

- Managed social accounts for 18+ clients. Accounts included state agencies, local retailers, service providers and Arkansas tourism initiatives.
